

News Release

Creation of OVVI Diagnostics Srl in Liege, Belgium

Liege Belgium, July 07th 2020.

OVVI Diagnostics Srl was created in Liege by a group of Investors led by Noshag, Robert Taub, Provestis and Jean-Patrick Voisin. The company will be located in Liege, initially at the GiGA, University of Liège's interdisciplinary research institute in the biomedical sciences.

The mission of OVVI Diagnostics is to create a point of care (POC) diagnostic test technology with a panel of tests specifically to address Women's health issues

In parallel to the creation of the company, OVVI Diagnostics takes over the Magnetic detection technology assets from Magnisense SE in France. Magnisense SE will become a subsidiary of OVVI Diagnostics and renamed OVVI Diagnostics France SE. The R&D laboratories of this company based in Dardilly, the Lyon suburbs in France, will continue.

"It is the aim of OVVI Diagnostics to become a major player in the point of care diagnostic field for Womens health" says the newly appointed chairman Jean-Patrick Voisin. The new company is based on a series of Belgian and French Investors and aims to build a series of diagnostic tests that are planned to be launched in the early to mid 20's aimed at women's health issues.

The areas of women's health and especially the complications around it and the need for a rapid POC diagnostic is an underserved market which OOOVI Diagnostics aims to fill through innovative and unique diagnostics tests based on IP and acquired technology as well as new international cooperation's.
